Problem Statement

During the Benefit Renewal, New Group Enrollment (NGE), and Transfer flows, there is a lack of transparency regarding "Who does what" for carrier enrollments.

- **The Gap:** While Rippling maintains accurate default transmission data, brokers—especially those new to a group or new to Rippling—often make incorrect assumptions about which tasks remain the broker's responsibility v what Rippling handles (“I thought Rippling was doing that”)

Derek Bettencourt Mon, Nov 24, 2025, 3:35 PM
Hi Ryan- At this time, eligibility for Cigna, Moda Health and Guardian is being managed through "Forms Sending" - it does not appear that EDI/API has been enabl

to Derek, Rachel, Evan, me

Thanks for confirming. Who is submitting the forms? Is that a Rippling task?

Windwalker Enrollment Discrepancies External

Summarize this email

Ashlyn Bradshaw <abradshaw@rippling.com> Fri, Jul 25, 2025, 2:50 PM
to Jose, Robert, Clay, Eli

Hi Jose & Rob,

I was looped into a request for Windwalker by their Technical Account Manager, Eli Sorensen regarding enrollment elections/events that were not processed by BCBS MA. I understand this situation is incredibly frustrating, especially with the financial impact on your client, and I want to assure you we're here to help clarify what occurred.

I believe there might be a misunderstanding regarding the enrollment submission process for this client. While you mentioned potential EDI/API feed failures, please note that this group's EDI feed is still in a testing phase and has not yet gone live. Our team is actively working through the discrepancies to bring it into production.

Even during the testing phase, we offer a backup submission method via emailed forms, which was utilized for this client. Below are the details of when and to whom these forms were sent:

Thu, Sep 18, 2025, 2:56 PM

Hi Ashlyn,

It's lovely to e-meet you! I really look forward to working together.

I have a current client with Rippling who could use some proactive support with their Regence file feeds – multiple employee enrollments have been supposedly emailed to Regence via Rippling, but none are getting enrolled, and when I connect with Regence for help they say that Rippling has been sent requests for additional information that never make it to the client. Is that something I could cc' you a reply to the client about, to see if there's an issue that needs fixing on the backend of their account? I'm actively triaging all enrollments and could really use some help from Rippling. The client has pinged Rippling support and can't get any answers, but it's a new problem – the system had been working.

Thank you!
Maya

Hello Ashlyn,

Hope you are well!

I joined One Digital in August of 2025 and I am the BC for New Directions for Young Adults. They recently moved to Rippling. Can you help me with the process of enrolling and disenrolling employees? I need to assist the Group Administrator. If there are any tutorials that she can review, I can forward to her.

I apologize, but I have not worked with Rippling or this group so I am not sure of the process. Are there File Feeds or does the group submit forms to our Service Team?

They currently have 4 Medical Plans with United HealthCare, 2 Dental Plans (DHMO & PPO) and a Vision Plan with HUMANA. They have a Base Life Plan with SunLife. COBRA Complete handles their COBRA. Does Rippling process Qualifying Events or does the GA at the Group?

Again, I apologize for my ignorance. I just need a little direction so I can assist the group. I have access to a couple of Rippling groups, but I do not believe I have access to New Directions for Young Adults.

Thank you in advance for your assistance!

Wade

Brittany,

My apologies, this thread got buried in my inbox and I in no way meant to be so delayed in getting back to you. Please accept this as a small token of my appreciation for your understanding!
https://app.postal.io/l/ykvknohh

I am looping in your partner success manager that handles support for our One Digital Brokers, @Ashlyn Bradshaw. Ashlyn, I have put the original request below so that you don't have to sort through the thread. Can you help Brittany and Darriean here?

Happy Tuesday! I hope you had a wonderful holiday weekend. I received 30 emails from Rippling over the weekend. Some included the carrier and some did not. It appears the ones that did not include the carrier were to CareFirst and they are all demographic change forms.

Can you advise when forwarding these forms to the carrier became our responsibility? Does the group not have a file set up? I'm curious why CareFirst is not included on the emails since the other forms included Unum. Please see screenshots below:

Hi Ashlyn,

Happy Friday! I hope this email finds you well and that your summer is off to a great start. 😊

I wanted to touch base on the carrier enrollment process for the group as I have still been receiving emails to process enrollments and demographic changes for CareFirst and Unum. I just want to make sure nothing gets missed.

Could you please remove me from the enrollment emails since our team does not process regular enrollments?

Is Rippling able to submit CareFirst enrollments via the CareFirst portal if Briana grants the Rippling team access? CareFirst enrollments and demographic updates need to be processed in the CareFirst portal for groups of NatureServe's size. I understand it is the group's responsibility to check that the enrollment was processed, but as of right now, it doesn't seem like enrollments are getting processed nor are demographic changes being updated.

Additionally, the Unum email address on file is accurate for enrollments but Unum does not maintain or retain employee-level address information in their system. They encourage that employers keep this information on record in the event of a claim. Is there a way to only send enrollment requests to Unum and not demographic updates?

We appreciate your assistance with this! I hope you have a wonderful weekend.

Thank you,

Brittany

- **The Cost:** Brokers tend to assume an integration is fully automated when it is actually a "Form-Sending" or “Manual” carrier (ie. Principal). This results in missed enrollments and high-friction escalations when the broker realizes weeks later that the "onus" was on them.

User Stories

- **As a Broker,** I want a clear summary of the **Transmission Method** for each carrier (EDI vs. Form vs. Manual) *before* I finish the build, so I don't assume a carrier is automated when it isn't.
- **As a Broker,** I want to see exactly which contact emails are currently set as defaults so I can confirm they align with my agency's preferred contacts
- **As a Broker,** I want the system to identify when I’ve added a new carrier that is eligible for **CarrierConnect (EDI/API)** so that I can initiate the setup request with one click while the plan data is fresh.
- **As a Broker,** I want to be alerted if a carrier is missing a **Group ID** so that I can acknowledge the transmission blocker and access the Help Center guide on how to resolve it before the plan year starts.
- **As a Broker,** I want a clear visual distinction between **Integrated** (EDI/API) and **Manual** (Form/Self-Manage) carriers so that I can formally acknowledge my responsibility for managing the Open Enrollment files for any non-automated connections.
- **As a PSM,** I want the broker to **self-attest** to their enrollment responsibilities during the renewal flow so that we reduce "Failure to Notify" escalations and ensure the broker knows exactly which tasks remain on their plate.

Functional Requirements

- **The Responsibility Matrix:** The audit screen must display a table showing: [Carrier Name] | [Transmission Type] | [Email/Fax Number if applicable]
- **Inline Editing:** The Audit Screen must allow brokers to edit "Sending form to" carrier contacts directly on the page without navigating back to the Integrations tab
- **Manual Acknowledgement:** For carriers flagged as “does not send forms” (NY Life, Principal) without EDI/API setup the broker must check a box acknowledging: *"I understand Rippling does not send electronic files to this carrier and I am responsible for employee enrollment management."*
- **Notification Controls:** A dedicated section to update CC-ed contacts for **Employee Enrollment Notifications**, ensuring the right agency staff are alerted to mid-year changes
- **EDI/API Initiation:** If a client has an active `CarrierConnect` SKU but a newly added carrier has no active connection, the system must surface an **"Enable EDI/API"** button.
- **Missing Group ID Safeguard:** For any new carrier lacking a Group ID, the broker must check a box acknowledging: *"I understand enrollments cannot be transmitted until a Group ID is provided."* * *Instructional Link:* Direct link to a Help Center article: *[Include Here]*
- **OE File Accountability:** For carriers without an active EDI/API connection, a mandatory acknowledgment is required: *"I acknowledge that for [Carrier Name], [Carrier Name], and [Carrier Name], I am responsible for submitting and confirming the Open Enrollment employee enrollments, as no automated connection is currently active."*
    - Ability to
- **Delegated Sign-Off:** Provide the ability to **"Assign to Admin"** for the review task. If the admin completing the renewal build is not the designated party for enrollment management, they can select another Admin/User on the account to review and sign off on these settings.
